Raft Rides allow all members of a family to experience the thrill of riding a raft together. Steep accelerator sections with frequent back to back curves create this exciting family centred attraction. Open or enclosed sections create light airy spaces or with opaque sections, dark forbidding tubes. Aqua Leisure's bespoke polycarbonate cover sections are easily retractable allowing the opening of enclosed rides during periods of clement weather.

Night time riding will provide a different experience and LED lighting features and external flood lighting can help enhance the mood. Sound, water and other visual effects can also be incorporated.

Family Raft Rides can accomodate either four or six people and will require a conveyor to convey rafts from the ride exit to the ride entrance launch conveyor.
