Company

People

The Flow Rider® is the first truly interactive sport & skill ride to emerge in the world of aquatic recreation. It is the only water attraction where spectators enjoy watching as much as participants enjoy riding, thereby enhancing it's visibility and appeal. The Flow Rider® allows a waterpark, resort, leisure centre or swimming pool, regardless of its geographical location to connect with the extremely popular board sports lifestyle, including fashion, music and entertainment.

Products

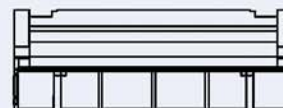

# R I D E R

Anyone can enjoy the excitement of surfing regardless of their age and skill level. Parents, young adults, teenagers and children can all experience the thrill of catching and riding a wave in a safe and controlled environment with no depth greater than 8 centimetres (3 inches). Flowriding is considered a sport requiring skill, practice and patience, and because it's a sport riders quickly want to develop and improve upon their skills.

Projects

The Flow Rider® is available in three models that will fit almost any footprint.
